

# Partial Launch - F7 -

This module allows you to select the parts to be manufactured for a newly introduced reference or one that already exists.

You may select the principal profiles, reinforcements, joints, hardware, glazing, glazing beads and joints for each frame.

For example, you may decide only to manufacture the glazing and beads of the door leaf to the left of a double-leaf or only the profiles for the third door leaf of a sliding door, without hardware or glazing, etc.

In the case of a "re-launch" of a reference that is part of a lot in progress or finished, simply copy the reference into a new file, select the parts to be manufactured again and launch the system in the usual fashion.
